Until recently, NASA Select Audio was retransmitted on
the WD80XB Repeater, 145.410, in Commerce Township.
Lately, though, I have noticed a distant Canadian ID
on that frequency, and WD80XB's machine appears to be
down.

How can I get Oscar-21...Rudak2...info by ftp or other means...?
I guess I need the keplerian data to update my satellite tracking program.

Voyage Through The Solar System"

A full- motion Journey through the heavens.

Age: 8 to Adult/ General Reference

Voyage Through The Solar System" is already winning accolades from across the country. The director of the Texas Space Camp rates this CD-ROM as the best new space title. The wonders of our solar system are presented in extraordinary detail with over 70 JPL/NASA movies, full narration and original music and slide shows.

This easy to use disk also has generous amounts of text , data and astronomical expert accounts providing hours of interactive entertainment and learning. Just point and click. The program operates on either PC Windows or Mac.....all on the same disc.

Each planet in our solar system is detailed with actual JPL/NASA probe photographs and one of the largest collection of full -motion videos and animation's ever compiled on one CD. You'll also find detailed information

on each planet's moons, scientific discoveries, comets and the asteroid belt all in an easy and fun to use interface.

System requirements:

PC Windows, 386 or higher, minimum of 4 mb of RAM, 640x480 256 color VGA graphics card and monitor, MPC-compatible sound card. Double speed drive recommended

Macintosh: LC11 or higher with 8 bit or higher color display, 5 MB of RAM. Double speed drive recommended.

Price: \$49.95 (we pay all air shipping and handling charges)
